

International students wishing to enroll in Tishk International University must adhere to important regulations below:

- 1- Application form should be filled by student (TIU web site). Include additional points for dormitory request.
- 2- Students must provide the official diplomas and transcripts from the last four years of their studies completed outside of Iraq. It is essential that these documents are the original copies and have been certified by both the Ministry of Education and Foreign Affairs of the respective country, and the Iraqi Embassy in that country.
- 3- Once these documents are submitted, the Ministry of Education (KRG) general directorate of examination will evaluate them for equivalency. This process determines whether the student meets the necessary academic standards to study in a Kurdish university.
- 4- If the equivalency assessment yields a scientific result, the student will have the opportunity to enroll in any department, provided they meet the required GPA criteria. On the other hand, if the equivalency result falls under the category of literature, the student will be limited to certain fields of study. Specifically, they may pursue degrees in disciplines such as Business and Management, International Relations and Diplomacy (IRD), Law, Tourism, Marketing and Entrepreneurship, English Language Teaching (ELT), Preschool Education, and Kurdish Language.
- 5- After the equalization process, students must submit university application form along with additional required documents. These documents include passport-sized photographs, a valid passport, etc. This comprehensive process ensures that international students are well-prepared for their academic journey in the Kurdistan Region. University will provide support for Residency Permit (Ikame process).
- 6- The university also conducts an English proficiency test (online interview with a prep committee) to assess the student's level of English.
- 7- Contact for additional information:
